UNO® DRUM

DMX Krew Artist Library

RELEASE NOTES

Overview

The DMX Krew Artist Library is a new UNO® Drum PCM soundset hand-crafted by artist, DMX Krew himself. We are very proud to present the great work he has produced for us.

This library replaces the factory PCM samples of UNO® Drum, while the existing Kits and Pattern presets remain unchanged. This means that after the installation, loading any Kit on UNO® Drum will sound different since it will load the PCM samples of the newly downloaded library, but together with the already programmed sound parameters and patterns. In the library, the first SOUND selection (which is “AN”, meaning analog, for KICK 1, KICK 2, SNARE, CLOSED HAT, OPEN HAT and CLAP, and “1” for TOM 1, TOM 2, RIM, COWBELL, RIDE and CYMBAL) will be the original sound of UNO® Drum, while sound selection 2 to 5 will be the new DMX Krew library sounds.
