

UNO® DRUM

Factory Preset Installer

IMPORTANT! READ ME BEFORE INSTALLING

Requires Firmware Updater v.1.0.3 to be installed prior. You may download the Firmware Updater v.1.0.3 from the IK Product Manager. Login and click on the 'Hardware' tab. Locate UNO Drum, click on the 'Drivers' tab for the Firmware Updater. Download and follow the on-screen instructions.

Warning: This Factory Preset Installer is only to be used under certain conditions. If you do not meet either of the below listed conditions, please **do not install**. This will overwrite your Presets and restore the UNO Drum to a default factory setting.

Only use the UNO Drum **Factory Presets Installer** if you:

1. Want to restore your UNO Drum presets to their like-new factory default settings. This will erase any saved presets you created.
2. If your unit is not displaying any stored presets or patterns.

DO NOT USE UNO DRUM DURING INSTALLATION OF THE FACTORY PRESET INSTALLER
