**CONFORMING PRODUCT LIST (CPL)  
Enforcement Technology Program  
International Association of Chiefs of Police (IACP)**

**October 21, 2010**

The International Association of Chiefs of Police (IACP) publishes a Conforming Product List (CPL) for enforcement-technology equipment. This equipment is intended for use in highway-safety programs. Device models that appear on the CPL have been tested and found to be in compliance with IACP's performance specifications that were in effect when the device model was first placed on the CPL. These performance specifications are intended to help ensure these devices are both accurate and reliable when properly operated and maintained. IACP recommends that law-enforcement agencies use this CPL as one of its criteria when purchasing enforcement-technology equipment. It is important to note that these agencies must also be aware of any applicable federal, state and local requirements since these requirements are outside the scope of IACP's performance specifications.

**TABLE OF CONTENTS**

**PART I: DOWN-THE-ROAD RADAR SPEED-MEASURING DEVICES and  
UNITS APPROVED BUT NO LONGER IN PRODUCTION**

**PART II: LIDAR SPEED-MEASURING DEVICES AND SYSTEMS and  
UNITS APPROVED BUT NO LONGER IN PRODUCTION**

**PART III: ACROSS-THE-ROAD RADAR SPEED-MEASURING DEVICES and  
UNITS APPROVED BUT NO LONGER IN PRODUCTION**

## PART I: DOWN-THE-ROAD RADAR SPEED-MEASURING DEVICES

The International Association of Chiefs of Police (IACP), through Cooperative Agreement number DTNH22-10-H-00317 with the National Highway Traffic Safety Administration (NHTSA), has tested and certifies that the following down-the-road radar speed-measuring device models meet all the requirements of the *Speed-measuring Device Performance Specifications: Down-the-Road Radar Module* (DOT HS 809 812, June 2004) published by NHTSA and available at <http://www.nhtsa.dot.gov/people/injury/enforce/DownTheRoadWeb/pages/index.html>. For additional information, refer to the **Notes** section at the end of this portion of the CPL.

**NOTES:**

- 1) Mode “S” refers to the stationary mode and mode “M” refers to moving mode.
- 2) Some of the models listed on the CPL may have operational features that are not a part of the model minimum performance specifications. It is important to understand that these features have not been tested or certified, even though the device itself has been certified to meet the model minimum performance specifications.
- 3) CPL certification for any individual device model will be voided by any third party modifications not specifically approved by the original equipment manufacturer and the IACP.
- 4) Test results and analysis contained herein do not represent product endorsement by the IACP nor product approval or endorsement by the National Highway Traffic Safety Administration, the U.S. Department of Transportation, the National Institute of Standards and Technology, or the U.S. Department of Commerce.

## PART II: LIDAR SPEED-MEASURING DEVICES AND SYSTEMS

The International Association of Chiefs of Police (IACP), through Cooperative Agreement number DTNH22-10-H-00317 with the National Highway Traffic Safety Administration (NHTSA), has tested and certifies that the following lidar speed-measuring device models and systems meet all the requirements of the *Speed-measuring Device Performance Specifications: Lidar Module* (DOT HS 809 811, June 2004) published by NHTSA and available at < [http://www.nhtsa.gov/people/injury/speedmgmt/speed\\_lidar\\_module/pages/index.html](http://www.nhtsa.gov/people/injury/speedmgmt/speed_lidar_module/pages/index.html)>. For additional information, refer to the **Notes** section at the end of this portion of the CPL.

**NOTES:**

- 1) Lidar Device – down-the-road speed-measuring equipment, which determines target range and speed based on the time-of-flight of laser light pulses reflected off a target. The term “lidar device” is synonymous with "laser speed-measuring device" and “lidar unit.”
- 2) Lidar System – a lidar device that incorporates additional equipment that is used to gather, process and/or recorded images to be used as part of speed enforcement efforts.
- 3) Manual Mode – a mode in a lidar system where an operator manually aims the lidar system to track the movement of a target vehicle while the vehicle’s range and speed are determined and images recorded.
- 4) Automatic Mode – a mode in a lidar system, which automatically determines a target vehicle’s range and speed and records images. This mode applies to both attended and unattended operation.
- 5) Attended Operation – an operator is an integral part of the evidence acquisition process.
- 6) Unattended Operation – an operator is not an integral part of the evidence acquisition process.
- 7) Some of the models listed on the CPL may have operational features that are not a part of the model minimum performance specifications. It is important to understand that these features have not been tested or certified, even though the device itself has been certified to meet the model minimum performance specifications.

- 8) CPL certification for any individual device model will be voided by any third party modifications not specifically approved by the original equipment manufacturer and the IACP.
- 9) Test results and analysis contained herein do not represent product endorsement by the IACP nor product approval or endorsement by the National Highway Traffic Safety Administration, the U.S. Department of Transportation, the National Institute of Standards and Technology, or the U.S. Department of Commerce.

### PART III: ACROSS-THE-ROAD RADAR SPEED-MEASURING DEVICES

The International Association of Chiefs of Police (IACP) has tested and certifies that the following speed measuring models meet all requirements of the *Speed-Measuring Device Performance Specifications: Across-the-Road Radar Module*, as adopted and published by Highway Safety Committee of the International Association of Chiefs of Police. The models appear on the list alphabetically by manufacturer. Listing of the model on the Conforming Product List (CPL) is not to be considered an endorsement of a specific manufacturer or model. For additional information, refer to the **Notes** section at the end of this portion of the CPL.
